07/13/2007

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/649,050

Applicant(s)

CHEN ET AL.

Examiner

Chuong A. Luu

Art Unit

2818

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 April 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 5-8, 14, 15, 17, 20-23 and 29-34 is/are pending in the application.
- 4a) Of the above claim(s) 29-34 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 5-8, 14-15, 17 and 20-23 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, claims 1, 5-8, 14-15, 17 and 20-23 in the reply filed on April 24, 2007 is acknowledged.

PRIOR ART REJECTIONS

Statutory Basis

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

The Rejections

Claims 1, 5-8, 14-15, 17 and 20-23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of Chen et al. (U.S. 6,737,320 B2) The current application recites all the limitations

Art Unit: 2818

broader than the teaching of Chen whose discloses the basic features of applicant's claims. Therefore, it would have been obvious to one of ordinary skill in the art to modify the teaching of Chen during fabrication of the semiconductor device.

For these reasons, claims 1, 5-8, 14-15, 17 and 20-23 are seen as obvious variations of the patented claims.

PRIOR ART REJECTIONS

Statutory Basis

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The Rejections

Claims 1, 5-8, 15, 20 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Lim et al. (U.S. 5,841,161).

Lim discloses a flash memory with

(1) forming a first dielectric layer (22) on a semiconductor substrate (21);

depositing a first polysilicon layer (25) above the dielectric layer (22);

introducing dopant atoms of a first type of dopant material into the first polysilicon layer during the deposition process (see column 3, lines 49-50);

forming a second layer (27) above the first polysilicon layer, wherein the second layer is doped with a second type of dopant material that is opposite the first type of dopant in the first layer (see column 3, lines 61-64);

forming a second dielectric layer (28) above the second layer (27);

forming a control gate (29) above the second dielectric layer (28) (see Figure 4E);

forming a source (30) and a drain (31) in the substrate (21) (see Figure 4F);

(5) wherein forming the floating gate comprises forming the second layer comprises forming second polysilicon layer above the first polysilicon layer (see Figures 4E-4F);

(6) wherein forming the second polysilicon layer comprises depositing the second polysilicon layer and introducing dopant atoms of the second type of dopant material into the second polysilicon layer during the deposition process (see column 3, lines 49-64. Figures 4E-4F);

(7) wherein forming the second polysilicon layer comprises performing an ion implantation process to introduce dopant atoms of the second type of dopant material into the second polysilicon layer (see column 3, lines 49-64);

(8) wherein forming the floating gate further comprises forming a barrier layer (24) between the first polysilicon layer and the second polysilicon layer (see Figure 4B);

(15) forming a first dielectric layer (22) on a semiconductor substrate (21);

depositing a first polysilicon layer (23) above the first dielectric layer (22);

introducing dopant atoms of a first type of dopant material into the first polysilicon layer (23) during the deposition process (see column 3, lines 49-50);

forming a barrier layer (24) above the first polysilicon layer (23);

forming a second polysilicon layer (25) above the barrier layer (24);

forming a second dielectric layer (27) above the second polysilicon layer (25);

forming a control gate (29a) above the second dielectric layer (27);

forming a source (30) and a drain (31) in the substrate (21) (see Figure 4F);

(20) wherein forming the second polysilicon layer comprises depositing the second polysilicon layer and introducing dopant atoms of the second type of dopant material into the second polysilicon layer during the deposition process (see column 3, lines 49-64);

(22) wherein forming the second polysilicon layer comprises performing an ion implantation process to introduce dopant atoms of the second type of dopant material into the second polysilicon layer (see column 3, lines 49-64).

PRIOR ART REJECTIONS

Statutory Basis

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The Rejections

Claims 14, 17, 21 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lim et al. (U.S. 5,841,161).

Lim teaches the above outlined features except for the dopant doses and the thickness of the barrier layer. However, the dopant doses and the thickness of the barrier layer are considered obvious. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the teaching of Lim by selecting the dopant doses and the thickness of the barrier layer since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art and it is noted that the applicant does not disclose criticality in the ranges claimed. In re Aller, 105 USPQ 233 (see MPEP 2144.05). Doing so would facilitate the manufacture of the semiconductor device and enhance the performance of the semiconductor structure.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong A. Luu whose telephone number is (571) 272-1902. The examiner can normally be reached on M-F (6:15-2:45).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven H. Loke can be reached on (571) 272-1657. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
